SUMMARY OF INFORMATION

The individual in question is no longer alive. He can be found on the surface for brief periods of time but he is usually several feet under the surface (maybe 3' - 6'). I cannot tell if there are any flotation devices present but there is something yellow under one of his arms.

Currents are moving him quickly to the West.

HANDLE VIA SKEET CHANNELS ONLY

Debriefing:

He is current in the Key West, Fla, area; his body position when he does surface is sideways. He has a B-7, yellow life preserver, but it is not inflated.
